The industrial computer Lenke MI-3300 was developed to meet the food industry's need of having a strong computer installed in the manufacturing area. Built in stainless steel, with 10,4 or 15 inches colored touch-screen display, the equipment can be washed and was designed to stand the slaughterhouses' aggressive environment.

Lenke MI-3300 has Windows Operating System and works as a normal computer. It allows online access to production data, making constant monitoring and dynamic acting possible with the acquired information. As a standard computer, Lenke MI-3300 can have programs for production controlling and recording, as well as managing other industrial equipment.

Technical Information

Construction

Protection grade:	Stainless steel, IP-67, armored, water resistant.
Assemblage:	Adjustable panel, support for tables and wall fixation.

Hardware

Operating system:	Windows XP / CE
Memory:	1GB
Disk space:	80GB
Touch screen display:	10.5 or 15 inches

Connectivity

Serial:	3 x DB-9 RS-232 bidirectional
Ethernet:	2 x IEEE 802.3,10/100 BASE-T
USB:	2 USB 2.0 doors

Power supply

Tension:	80-240VAC 50-60 Hertz
