

Manual Grader for Weight Band LK 205.C1

Precisely rate your product
on weighing and get low
cost production control

Follow up with your
Smartphone.

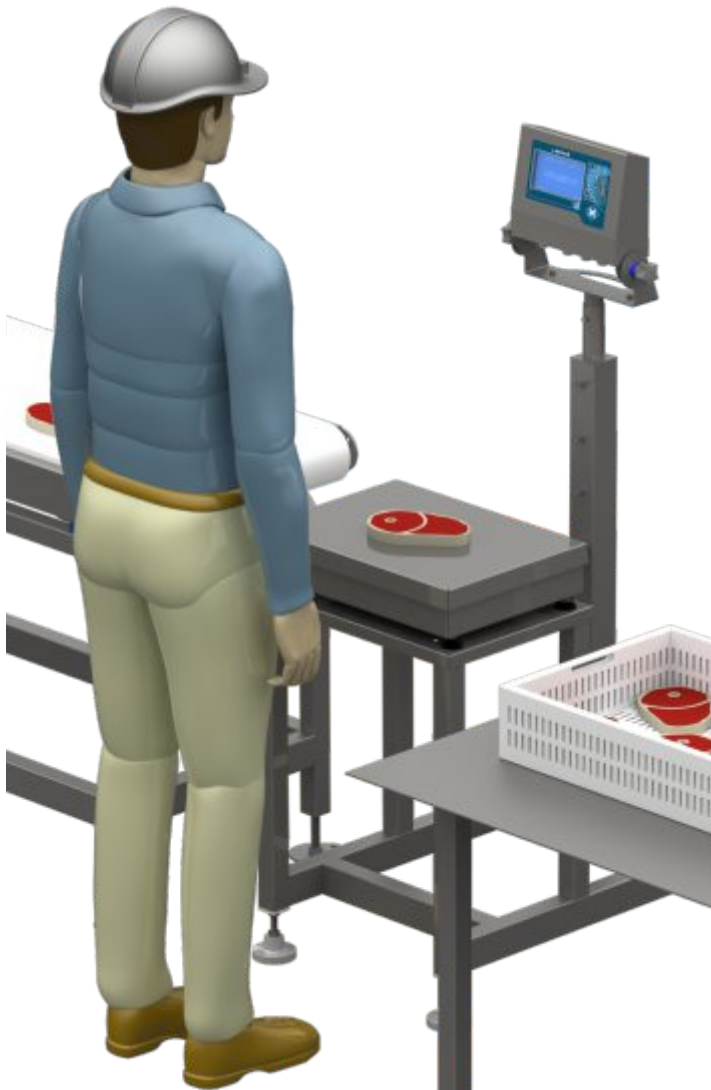

illustrative image.

- Industrial weighing module with up to 120 weight samples per second, guaranteeing speed and precision;
- High robustness in its construction;
- Industrial weighing platforms: 6kg, 15kg; 30kg, 60kg, 150kg;
- Digital I/O, Ethernet, Serial ports, etc.;
- Web server to access the terminal via browser.

The manual weighing scale has the highest technology to meet the stringent requirements of the food industry. The product is weighed manually and separated according to the weight range. The scale is programmed by the customer, which determines the number of tracks to be sorted. The product may be frozen or fresh. After placing the product on the weighing platform, the terminal will inform the classification weight range and may send a signal to indicate the range. The system can classify up to 8 weight ranges.

**DATA INTEGRATION**

All data generated by the weighing stations can be integrated with the corporate system through relational database or export files.

TECHNICAL SUPPORT

LENKE has been operating for more than 20 years in the market and has an experienced team of professionals to serve your company with quality and efficiency.

IMPROVE YOUR GRADING

With the manual weight sorter you have the production report in your hand, obtaining a daily summary of weighings with control of the quantities produced. This option will enable production control, avoiding unnecessary losses and leaving the process more secure.

ADDITIONAL RESOURCES

- Tag generation;
- Management Reports - product weight curve;
- Production record;
